

Authorized Turbocharger Services

- Computerized balancing
- Overhaul of rotors & casings
- OEM spare parts & exchanges

Before: ABB VTC-254 turbos installed on CAT 3612 diesel engine

After: Napier NA297 turbocharger installed with new platform and air intake.

MSHS Turbo Retrofit Program

Retrofit your aging ABB VTC 254 turbo with a Napier 297

MSHS Turbo Retrofit program utilizes and supports the most reliable and regarded turbochargers available in the market. Focused on owners and operators of older diesel engines, the program offers our customers modernization and lifetime extension of a vessel and/or generating plant.

- Reduction of emissions & specific fuel oil consumption (SFOC)
- Temperature reduction & lifetime extension of combustion components
- Higher engine efficiency
- Improved spare parts availability & support
- Extended time between overhauls (TBO) & cost reduction
