

# Embossed cartridges up to 1200 mm

## Filter cartridges for dedusting systems

Hengst offers custom-designed filter concepts and an extensive selection of standard sizes as defined by DIN 71459.

From a wide range of sizes and materials, the user can select the filter that is ideally suited for the particular application, such as powder coating plants, sandblasting equipment, gas turbines (intake air filtration), welding smoke exhaust systems, pneumatic conveyor systems, crushing and mixing plants as well as bottling and draining plants.
