

PROJECT: Cruise Line Support During Prime Mover Maintenance

PB_000010

▼ APPLICATION

Cruise line vessels operating within the Caribbean Sea

▼ MAN PROPULSION

Marine Engines:

- ▶ Cylinder heads 48/60B

▼ PROJECT OVERVIEW

Motor-Services Hugo Stamp, Inc. (MSHS) has an ongoing partnership with a leading cruise line, and was commissioned to recondition complete sets of cylinder heads for the prime movers, from two 1,115 foot cruise vessels for their scheduled 18K hour maintenance.

PROJECT REQUIREMENTS

This project required the cylinder heads to be quickly and efficiently reconditioned in our facility and returned to, enabling the operator to resume operating in the shortest amount of time.

MSHS specializes in reconditioning projects. With the combination of scale and of supply, technical support and the ability to translate customer needs into workable and effective solutions, MSHS was able to exceed the customer's expectations, and completed the project ahead of the requested delivery.

PROJECT RESULT

MSHS qualified and experienced OEM factory-trained service engineers provided the services and maintenance necessary, and to conduct the engine reconditioning, resulting in minimized downtime.

Through the application of innovative products and services, MSHS specializes in the testing, maintenance, repair, and overhaul of diesel engines, turbochargers, water jets, and filtration systems. Factory-trained service engineers and technicians are on 24-hour call, providing everything from complete overhauls to laser alignment, engine diagnostics and video inspections, maintains an extensive inventory of OEM parts, and can provide dockside delivery and customs clearance for parts.

MSHS is part of the MSHS Group offering turn-key solutions for prime movers in marine and land-based power applications. Learn more at www.mshs.com or email us at info@mshs.com
